

A Digital Electronic Church Bell System at an Affordable Price

The Prism church bell system is an automated system for the playing of bell sounds. The solid state design has no moving parts for maintenance and trouble free use for years. The carillon system is complete with controller, amplifier, wiring kit, outdoor speakers and detailed installation instructions.

Features of the bell system include:

Funeral Tolling – Manual Start/Stop – selectable toll sounds.

Wedding Bells – with manual Start/Stop Peal of Bells

Call to Worship/Mass - bell sounds started manually or on a schedule.

Angelus – can be programmed for 12pm & 6pm or manual Start/Stop

Seasonal or daily service - bell performances may be programmed .

Hour striking- half or full hours can be programmed.

Holidays- The system can also be programmed for events like Easter, Christmas, and New Year’s Eve.

Hymn Playing – the system may play preprogrammed hymns added by the user.

- Each system is programmed with bell sounds specifically for your church.
- You will select your bell sounds from extensive an bell sound library

Special Features-

- The user may add new sounds from your computer.
- The system is controlled with a radio frequency hand controller. The hand controller has a two-way communication screen to provide the user the ability to select the bell sounds and start them remotely.
- The Complete Prism Kit is all you will need. Installation can be done by your maintenance people.
- The user simply plugs it into a standard wall outlet and connects the 2 speaker wires. The 2 outdoor speakers can be installed by almost anyone with our instructions.
- EXPANDABLE - remote control of lights, A/V system (iphone/android control) sold separately
- Two year warranty
